

Innovation in prostate surgery webinar

Improving patient outcomes through advances in surgical techniques, diagnostics and AI-powered decision support

Wednesday 21 May 2025

12.30-14.00

[REGISTRATION LINK](#)

Why attend?

- Hear from clinicians and scientists leading world class prostate cancer research in Oxford.
- Learn from the authors of the landmark TRANSLATE trial, which is changing diagnostics for men who may have prostate cancer.
- Gain insight into new technologies and techniques that will reduce side-effects and deliver better patient outcomes.
- Understand the cutting-edge science that is shaping prostate cancer care in the UK and around the world.

Speakers

- **Mr Tom Leslie**, Consultant Urological Surgeon, Oxford University Hospitals; Urology Clinical Advisory Group Lead, Thames Valley Cancer Alliance
- **Prof Freddie Hamdy** CBE, Professor of Surgery, Nuffield Department of Surgical Sciences, University of Oxford; Consultant Urological Surgeon
- **Prof Richard Bryant**, Associate Professor, Nuffield Department of Surgical Sciences, University of Oxford; Consultant Urological Surgeon
- **Mr Aaron Leiblich**, Consultant Urological Surgeon, Oxford University Hospitals
- **Dr Sandy Figiel**, Postdoctoral Research Scientist, Nuffield Department of Surgical Sciences, University of Oxford

Who should attend?

Oncologists, urologists, advanced nurse practitioners, cancer service managers, specialist oncology pharmacists, NHS leaders, commissioners, those involved in prostate cancer pathway transformation.
