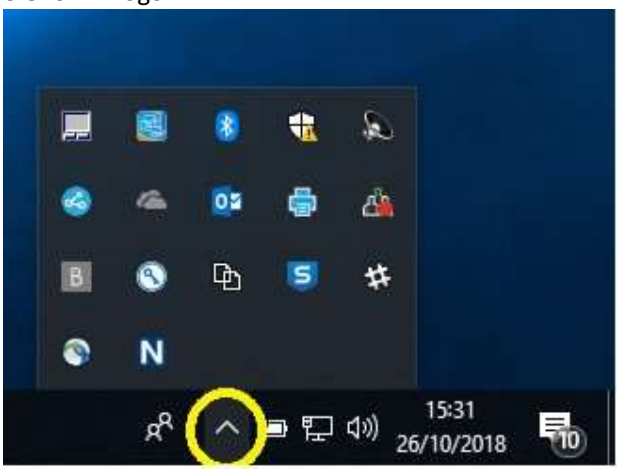
Mapping Network Drives Using a University PC

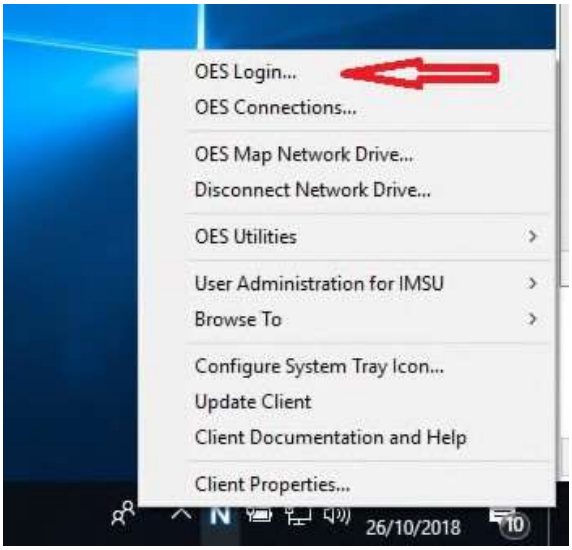
Before you can log into the network drives remotely. You will need a connection to the University network using either the IT Services or Medical Science Division VPN.

Please follow the VPN guide here.

- Please use the system tray (triangle symbol near the clock bottom right of windows screen) to find the OES 'N' Logo



- Then right click-on the 'N' & click on 'OES Login…'



- You can then log in (use the credentials you normally use to log into your computer to see your network drive:

- Client for Open Enterprise Server Login
Network Client
